

This product is designed to help reduce corrosion.

This extension of the Safer than Salt® product line, is a proprietary formulation of calcium chloride, magnesium chloride, sodium chloride and CI-56™ a Corrosion Inhibitor. **Tests have proven that this product will melt more than twice as much snow and ice as most other melters in the marketplace.** It works faster and at temperatures when many other products have stopped working.

Safety green color coating assures visible, complete coverage and helps protect your bottom line.

Safer than Salt® with CI-56™ a Corrosion Inhibitor. is formulated to be seen when used. Most “white” ice melt products disappear into snow and ice. Users tend to over-apply, or worse, under-apply product because they can’t see where it lands. Additionally, in today’s litigation-driven society, this product affords users positive proof that an ice melter is in use.

Environmentally Sound

Because Safer than Salt® with CI-56™ a Corrosion Inhibitor. melts more effectively than other products, a smaller quantity is needed to remove snow and ice: **Environmental impact on grounds and vegetation is minimized.**
